

# IT'S ROCKET SCIENCE

# STEM TEACHER MASTERCLASS

## AVIATION, SPACE SCIENCE & ROCKETRY STEM

Designed to extend knowledge and build capability to implement the STEM curriculum in a creative, functional and FUN way for use in any classroom setting.

### PRACTICAL SOLUTIONS FOR TEACHERS

ACARA mapped training will demistify STEM applications using the platform of either aviation or rocketry. Discover new ideas, effective teaching resources, inspire creativity and showcase innovation through out-of-the-box training to build professional confidence and capability.

### STEM PROJECTS & DESIGN CHALLENGES

STEM activities can be limited by a lack of ideas, resources and time. Half and full day programs are perfect for beginners or teachers looking to fill their STEM toolbox with new ideas. Spectacularly fun project-based STEM investigations will develop an understanding of the basics of rocketry design, structures, propulsion and flight principles through engineering design projects and challenges.

### EXPERT INSTRUCTION

Designed and facilitated by our CASA licensed airline pilot and team of certified rocketry specialists. With over 40 years combined industry experience, we are sharing our expertise and skills with the education industry.
